Professional Summary

Master of Information Technology graduate from the University of South Carolina with hands-on experience in cloud systems, web development, UX/UI design, and AI data support. Skilled in AWS, SQL, Figma, and technical support, with practical experience in cloud-based workflows, website development, and computer vision dataset preparation.

Education

University of South Carolina Columbia, SC
Master of Information Technology Aug 2024 – May 2026
Coursework in databases, web applications, systems analysis, and project management. AWS Academy Cloud Foundations and Cloud Architecting certified.

University of Macedonia Thessaloniki, Greece
Bachelor of Science in Economics Oct 2018 – Nov 2022
Focus on international business and cross-border economic analysis; strong analytical and research skills applicable to data-driven decision-making.

Experience

Pivai Columbia, SC
IT Assistant (Hybrid) Aug 2025 – Present

- Support website development and maintenance, including front-end updates and user-facing components.
- Perform image annotation for computer vision datasets (crack detection, pothole identification, traffic sign detection) and manage datasets in Amazon S3.
- Collaborate on cloud-related tasks and ongoing technical development in a hybrid work environment.

Projects

Pivai Website 2025 – Present
Designed and developed the official company website, translating complex AI and infrastructure technology into clear web content for a technical and enterprise audience.

Euroleague Atlas – Relational Database & Web Application Feb 2026 – May 2026

- Built a PHP/MySQL sports archive with a 19-table normalized schema, 10 seasons of data, standings, player profiles, game logs, awards, and an interactive grid puzzle.
- Wrote 15 advanced SQL queries (joins, subqueries, aggregates, HAVING); implemented full CRUD through a browser-accessible interface.

FitLog – Fitness Tracking Application Jan 2026 – May 2026

- Designed 14-screen Figma wireframes and built a Microsoft Power Apps prototype with workout logging, edit/delete, progress tracking, and authentication for an IS&T course project.

RestoreX – Healthcare App UX/UI Design Aug 2025 – Dec 2025

- Designed 25+ Figma screens for a mobile injury recovery app; applied HCI principles focused on usability, accessibility, and intuitive navigation.

Project Management Plan – Team Simulation Jan 2025 – May 2025
Developed a complete project management plan covering scope, scheduling, risk, and resources; delivered multiple team presentations and a final report.

Skills

Cloud & IT: AWS, Amazon S3, Cloud Computing, IT Support **Web & UX/UI:** HTML, CSS, Figma, Wireframing, Prototyping, UX/UI Design
Programming & Databases: Java, SQL, Relational Database Design, Data Modeling
AI & Data: Roboflow, Image Annotation, Dataset Labeling **Tools:** Microsoft Power Apps, PTB Essentials

Volunteering & Languages

Youth Program Volunteer, One Share One Love Feb 2025 – May 2025
Supported youth engagement activities and collaborated with volunteers to foster a positive, structured environment.
Languages: Greek – Native | English – Professional Working Proficiency | Turkish – Basic
